NEWS RELEASE

ABBASTAR URANIUM RETAINS WATTS, GRIFFIS AND MCOUAT

February 12, 2008

TSX Venture Symbol: ABA

Abbastar Uranium Corp. (the “Company” or “Abbastar”) has retained the services of Watts Griffis and McOuat Limited (“WGM”), an international consulting firm, to prepare a preliminary independent review report assessing the work completed to date on its Doran uranium property (the “Doran Property”) situated on the North Shore of the Gulf of St. Lawrence in Quebec.

Abbastar has now completed 63 drill holes on the Doran Property and with promising results to date (see news releases dated August 23, 2007 and February 4, 2008) has decided to engage the services of WGM to recommend an exploration approach that will maximize the potential of the Doran Property. It is anticipated that the data review and analysis, in conjunction with future exploration and drilling programs in 2008, will advance the project towards preparation of an updated NI 43-101 report and as warranted Mineral Resource estimation. The Company believes that this work will provide the foundation necessary to produce an accurate assessment of the Doran Property’s value.

Operating worldwide since 1962, WGM is a firm of geologists and engineers that provides a comprehensive array of services to the mining industry. It has built an excellent reputation in all aspects of project management including data compilation, target selection, geophysical and geochemical surveys, drilling, preliminary feasibility studies and project management.

On behalf of the Board,

Gary Schroeder
President & CEO
